Q6 Selecting all that apply, complete the following sentence: Standards-based grading is the best method for grading:

Elementary school students,
Middle school students,
Jr. high school students,
High school students

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Caution I agree with the philosophy of SBG. Right now, our current technology does not provide the feedback and cohesion that I need as an educator to truly embrace SBG. I don't feel like the data students are able to access is providing the type of feedback SBG has the potential to provide. I am using SBG philosophy in a modified way, through rubrics and outcomes to provide skill based assessment in a more streamlined manner.

Middle school students,
Jr. high school students,
High school students

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Caution Standards-based grading is a great idea IN THEORY. I essentially grade this way, but don't convert to a "4-point system" or a "5-point system" or otherwise. I try to grade everything based on whether or not the student has met the objectives in the class, and mastered the skills, tools or processes that I am trying to teach. I think this is good teaching practice. I also think there's an improper focus on shifting from a scale of 0-100% to a scale of 0-4. That's not what's important, in my mind. What's important is that students are learning what they are supposed to be learning, and their grades reflect whether or not that is happening.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Caution **Unfavorable** Regardless of what the district's decision is to use SBG or not, I think that it should not be an opinion of whether to use it, but rather a decision that comes from administration and needs to be consistent in all schools. To implement this, the district could have started with the incoming K class, then slowly as each class moved up, teachers could have implemented and learned... Basically over a 12 year period the district would be more confident in the system.

Q6 Selecting all that apply, complete the following sentence: Standards-based grading is the best method for grading: **Elementary school students, Middle school students**

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Unfavorable I want to say that I am currently moving towards SRG. As a teacher who has been around awhile I have some pretty good ways of assessing student progress but I'll adapt if required. It's not a huge difference but is time consuming to change rubrics and the way we are required to present standards on our Canvas page.

I feel that you can find an argument on either side of any debate. I feel that this way of grading asks teachers to re-evaluate standards and proficiency (always good) but I'm not convinced that it's translatable to our A-F grading scale and I also question how this scale looks to colleges (though I feel that grades nationwide are not really standardized so I really question how grades calculate into the admissions process, especially since we've now eliminated class rank). What I do know is that students and parents continue to be obsessed with grades. Students and parents need a simple and consistent system that they understand and support. Also, there is a sense that many more students feel that they should be able to re-take any test. This is very time consuming and it's questionable if the 'test' can accurately evaluate the understanding of content after the first attempt.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Unfavorable It's not a one size fits all. In theory, it seems like a good idea, but practicum has not been addressed for all areas. For example, SPED and ELL standards need differentiation for all subjects. Who creates those? Core classes have more of a nationwide bank to pull from, but non core does not, especially specialty electives.

Also, since colleges don't implement this system, our students have to readjust once again when they leave our system.

I personally have not started using it because I have to create everything myself and by myself for 3 different courses. It's too much.

Jr. high school students,
High school students

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Unfavorable It is a difficult system to use and to transition to. Colleges still want an actual grade, and the standards have to be equated and changed to an actual grade for transcripts. The problems I've encountered with SBG is that it is padded and the students scores are often higher than they should be.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Caution **Unfavorable** I believe in the practice of standards referenced grading; however, PowerSchool Pro is not a tool I can stand by. Using a 4 point scale is helpful for grading skills and standards, but the reporting system within PowerSchool Pro takes it one step too far. It can be confusing for parents and students and is somewhat incongruent with the larger community and nation's expectations for reporting.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Unfavorable Standards based grading is a good tool to ensure students are able to meet that objective only. What happens when you need to utilize multiple standards to complete a math problem? We need to incorporate competency not just standards. Also, if a student is fine with meeting a standard of say 3 on a 1-4 scale, what happens if the following year they need to have a 4 in order to even grasp never mind master the next level. My classes require a lot of critical thinking so it is not just meet a standard but really thinking through problems with multiple tools

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Caution **Favorable** **Something else to work on** I like standard based grading. I think it allows the students to have accountability and know directly how they are doing on a skill. In my classroom, students can check how they are performing on a standard and select individualized lessons to help them improve. It gives the student more responsibility and ownership of their learning. I think it also helps to take the subjectivity out of a grade (ie-homework grade/participation/etc). I wish we had a program for literacy that directly aligned to the standards and had us focus on a standard for a given amount of time. I also wish there was a standardized report card for all schools at a given grade level rather than each grade or school having their own.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Caution **Unfavorable** All course standard are not created equally IMO. SBG works nicely with some sets, but very difficult to implement with others. The feedback I'm receiving from students who have some teachers using SBG is very bad. Perhaps it's an implementation issue or just the newness. I'm open and will try it.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Unfavorable My feeling is that STG is taking away from all the practices of teaching students through multiple avenues of learning. As a teacher with a lot of experience I have seen that many of my colleagues will teach to the standard only. The problem with this is that the standards don't teach many of the things students need to provide them the knowledge needed to be truly proficient. The standards are vague, teachers are placing grades in the standard that fits best, students don't know what they are being graded on, and most importantly there is less ability for students to get support. It is a blind way of assessing and detrimental to the ability for students to advocate for themselves, and dangerous as teachers will teach to the standards only. The measuring of student learning should be clear for teachers, students and parents to support their children. The stigma that by taking away grades students will feel more confident is not true. There is still a value system in place. Better teaching and caring atmospheres don't necessarily equate with how we grade.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Favorable SBG is an excellent assessment system that I believe fixes many of the issues with the traditional system. Traditional grades often felt arbitrary with kids having to check off boxes to get an A. With SBG, students look to challenge themselves to show their proficiency. I've been at schools that implemented full SBG (PC uses SRG) differently than PC so I was a bit skeptical that the differences would help our students. However, I've been pleasantly surprised. I usually have around 20 or so students with D's and F's at the end of the quarter. So far I've only had 4. Our students really stepped up to the plate and took responsibility for their learning and growth. Like all new systems, SRG and eventually SBG will have some kinks that need to be worked out, but in my experience the benefits are clear.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Unfavorable It is not applicable to all content areas, as some areas NEED to assess GROWTH and IMPROVEMENT, not proficiency. For example, a student may NEVER achieve proficiency at certain PE skills, but may improve greatly. SBG has no way to reflect that. Likewise, some of the standards are so vague or subjective that it is difficult to determine 'proficient.' I don't use it because it is not required/mandated . . . yet. When we are required to use it, I already predict (and have already heard conversations to the effect that) many teachers will 'fake' it to jump through hoops and not lose enrollment (esp. electives that depend on students getting high scores, rather than actually becoming proficient to ensure continuation of the program - ie. numbers).

Q2 Did you participate in the decision to implement SBG/SRG or was it decided for you? **Respondent skipped this question**

Q3 Were you formally trained on SBG/SRG prior to implementing it? **Respondent skipped this question**

Q4 At this time, do you feel you have all the tools, knowledge, and resources to use SBG/SRG with confidence? **Respondent skipped this question**

Q5 What grade level do you teach? **K-5**

Q6 Selecting all that apply, complete the following sentence: Standards-based grading is the best method for grading:

Elementary school students,
Middle school students,
Jr. high school students,
High school students

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Favorable Letter grades are useless! They don't tell you how much growth has occurred, nor does it show you specifically what the child needs to improve upon.

Q6 Selecting all that apply, complete the following sentence: Standards-based grading is the best method for grading: **None of the above**

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Unfavorable There is not a current valid reason that I have been given by other teachers or administration that has convinced me that SBG is better than what I currently use . . . and I have seriously looked at SBG. The present notion that SBG is going to motivate students or help students perform better or learn at a more in-depth level , in my opinion, is unsubstantiated. Thanks for asking

No Opinion

I'm new to it. I'm a PE teacher in Elementary and obviously don't use it. My son has it now but I have nothing to compare to for middle school. this is his first year.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Unfavorable I worry that SRG does not encourage effort. While academics are important, effort and the ability to work hard and the understanding that hard work is important will get students through the hard times in their future. I think life skills are the most important things we teach and they are not measured by academic standards.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Favorable I use it because it shows kids actual skill levels. It also gives kids who do not do well with A-F level grading a chance to shine. They are able to show they are proficient in areas and can show growth rather than just getting at F. I also think it is more valuable information for both teachers and students of how their students are actually performing and what skills they are strong in or which skills need some attention. The biggest thing for me though is the focus on growth, not perfection.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Unfavorable Only a few teachers are actually trying to implement it. Even if we've been talking about it for a few years, it feels like not much is happening. Research shows it works. In order to really be efficient, we need everyone on board and better PD and tools.

High school students

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Caution At the high school, we are reporting letter grades per course per quarter, so nobody 9-12 is using real SBG. There are many of us who are trying to use principles of SBG in our grading schemes, but ultimately, PowerSchool averages points and spits out a letter grade. So whatever answers you are getting in this survey, the answer to "who is using SBG" at the High School (and Treasure as far as I know) is ZERO. Until we change our reporting system (as Ecker has), we will not realize the full promise of SBG.

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Caution **Favorable** SBG is a better assessment to use with students in terms of showing growth. We should not be so concerned about getting an average, but rather developing a procedure that allows students to retake and relearn material throughout the school year. SBG allows this process to happen. There is no perfect grading system; however, this is a step in the right direction. If it were up to me, I would do away with grading altogether! We need to move away from our old methods of thinking about education and grading.

Page 1: Standards-Based/Referenced Grading and You (All PCSD Teachers)

Q1 Are you currently using SBG or SRG? **SBG**

Page 2

Q2 Did you participate in the decision to implement SBG/SRG or was it decided for you? **It was decided for me.**

Q3 Were you formally trained on SBG/SRG prior to implementing it? **Yes**

Q4 At this time, do you feel you have all the tools, knowledge, and resources to use SBG/SRG with confidence? **Yes**

Q5 What grade level do you teach? **6-7**

Q6 Selecting all that apply, complete the following sentence: Standards-based grading is the best method for grading: **Elementary school students, Middle school students, Jr. high school students, High school students**

Q7 What else would you like to say about SBG/SRG? (And if you don't use it, why not?)

Favorable What is a B? A B+? I am not really sure except that it's not an A. Did the student understand all that needs to be mastered? Does the student know what needs to be mastered? SBG answers these questions. Students know what needs to be mastered and the grade reflects just that. A "3" is mastery, a "2.5" is understanding but not independently mastered, A "2" means the student has some understanding but needs assistance to get to the answer. It's very clear to me as a teacher and even clearer to students. Back to the B grade. Students always used to ask me, "What do i need to get an A?" and that was never a clear answer. With SBG it is.

#72

INCOMPLETE
